## FP-e Control Unit <br> New Born! Advanced PLC! <br> Timer, Counter, Hour meter, Temperature Controller and PLC in a Unit

Type

| Name | Type | Calendar <br> timer | Thermocouple <br> input | COM. <br> port | Part number |
| :--- | :--- | :---: | :---: | :---: | :---: |
|  | Basic type (RS232C) | Thermocouple input type (RS232C) | Available | Available | RS232C |
|  | Calendar timer type (RS232C) | AvPE214325 |  |  |  |
|  | Basic type (RS485) | Not available | Not available | RS485 | AFPE224302 |
|  | Thermocouple input type (RS485) | Not available | Available | RS485 | AFPE214322 |

## Features

1. 5-character, 2-line, 3-color Display Simple characters and numerical values can be displayed. Simple error messages as well as operation instructions and timer/counter set values can be displayed.
2. Front Operation Switch

Timer/Counter/Temperature set values can be changed using front operation switches. The switches can also be used as input switches (X30 to X3F), which save the need for installing external switches.
3. Equivalent to FP0-C14 Intelligence of Small PLCs
The FP-e has same functionality as FPO such as pulse output and high-speed counter functions. Other than a tool port, a unit is equipped with COM. port (RS232C/RS485) for communication.
4. Easy Programming Using Wizard Screen display program can be easily created using wizard on FPWIN GR software.

## 5. Smooth Debug

Monitoring the memory area data and I/O status facilitates debug using the R (register) and I (I/O monitor) display modes.
6. Panel Mounted Type

The front panel of the FP-e is water-proof IP66.

## Display modes and functions

(Normal mode)

Displays some characters and numerical values, and numerical data can be changed.

## S mode

(Switch mode)

Displays characters and numerical values. Function switches can be used for input.

## R mode

(Register mode)

Displays a value of a register in the FP-e.
The value can be changed from the front panel.

1 mode
(I/O monitor mode)

I/O status $(X, Y)$ in the FP-e can be displayed.

## FP-e Features

## The panel mounted type PLC FP-e is ideal for the control of small machines and distributed control.

Do this, do that, do everything.

## All in One!

## - 3-color Display

Simple characters and numerical values can be displayed. Simple messages as well as timer/counter/temperature settings and elapsed values can also be displayed.

## Built-in operation switch

Setting values can be changed. The operation switch can also be used for input.

Compact and Space-saving
Panel mountable, little space is taken up on the control panel. The size is only $48 \times 48 \times$ 70 mm (depth).

- Matches FPO intelligence (equivalent to FPO-C14)

IP66 Panel mounting type
Based on your panel design, the color can be changed to black. (option)

Same Programming software for all FP series PLC

## Control FPWIN GR

Ladder programming software is the same as that used for the FP series.

An FP-e screen display program is generated by simply entering values in the wizard screen.

## Built-in RS485 or RS232C COM port

- Up to 99 computer link stations can be connected to one network with RS485.
Up to 32 computer link stations are possible using a C-NET adaptor and up to 99 are possible using a commercially available adaptor. This makes it possible to monitor operation status or perform control.

- Two RS232C Devices can be connected to one FP-e. (RS232C Type)

Personal Computer

## Temperature control

- Two-point K-type thermocouple ( -30 to $300^{\circ} \mathrm{C}$ )
connection is possible. (equipped with thermocouple input)
FP-e can combine temperature controllers, small PLC, timer and counters.

## PID instruction/Auto-Tuning

Accurate temperature control can be achieved with built-in PID instruction.

## Built-in high-speed counters and 2-axis independent motion control.

## - Pulse output

The unit comes with 2 channels of built-in pulse output up to 10 kHz .
Since these two channels can be separately used, the FP-e is also suitable for 2-axis independent positioning.

## - High-speed counter

The FP-e has 4 built-in high speed counters.
1 phase $\times 4 \mathrm{ch}$ Total $10 \mathrm{kHz}(5 \mathrm{kHz})^{*}$
2 phase $\times 2 \mathrm{ch}$ Total $2 \mathrm{kHz}(1 \mathrm{kHz}$ )

* Thermocouple input type.

■ Performance specifications

Notes 1) The time takes longer every 250 ms .
2) The proportion of timer points to counter points can be changed using a system register
3) Precision of calendar timer:

At $0^{\circ} \mathrm{C} / 32^{\circ} \mathrm{F}$, less than 200 seconds error per month
At $25^{\circ} \mathrm{C} / 77^{\circ} \mathrm{F}$, less than 70 seconds error per month
When using the COM port for seconds error per month
4) When using the COM. port for communication, retransmission is recommended The RS232C driver IC for the COM. port conforms completely to EIA/TIA-232E and CIIT V. 28 standards
5) The max counting speed ( 10 kHz ) is the counting speed with a rated input voltage of 24 V DC and an ambient temperature of $25^{\circ} \mathrm{C}$. The counting speed (frequency) will be derated depending on the voltage and temperature.
6) If the unit is equipped with both reset inputs $X 0$ and $X 1, X 2$ serves as the reset input for $X 1$.

If $X 3$ and $X 4$ are used, $X 5$ serves as the reset input for $X 4$.
7) When the positioning control instruction " $F 168$ " is performed, the maximum output frequency is 9.5 kHz
8) The program, system registers and the hold type area (internal relay, data register, and timer/counter) are backed up by the built-in EEP-ROM
When a battery is replaced with a new one in the FP-e unit with a calendar timer function settings can be changed. The data cannot be stored even when the settings are changed using the system register without installing a battery
9) F180 (SCR) and F181 (DSP) instructions are supported from Control FPWIN GR Ver.2.2 Up to 640 words can be written into EEP-ROM by P13 (PICWT) and retreived back by F12 (ICRD)

## General specifications

| Item | Description |  |
| :---: | :---: | :---: |
| Rated voltage | 24 V DC |  |
| Operating voltage range | 21.6 to 26.4 V DC |  |
| Allowed momentary power off time | 10 ms |  |
| Ambient temperature | 0 to $+55^{\circ} \mathrm{C} 32$ to $+131^{\circ} \mathrm{F}$ |  |
| Storage temperature | -20 to $+70^{\circ} \mathrm{C}-4$ to $+158^{\circ} \mathrm{F}$ |  |
| Ambient humidity | 30 to $85 \%$ RH (at $25^{\circ} \mathrm{C}$, non-condensing) |  |
| Storage humidity | 30 to $85 \% \mathrm{RH}$ (at $25^{\circ} \mathrm{C}$, non-condensing) |  |
| Breakdown voltage | Between the insulated circuits: 500 V AC for 1 min . Only between (3) Output terminal (Y5, COM) and other insulated circuit: 1500 V AC for 1 min . | Insulated circuits <br> (1) Power supply terminal, function earth, input terminals (A0, A1) COM. (RS232C) terminal |
| Insulation resistance | Between the insulated circuits: $100 \mathrm{M} \Omega$ or more (measured with 500 V DC) | (3) Output terminals (+, -, YO to Y4) <br> (4) Output terminals (Y5, COM.) <br> (5) COM. (RS485) terminal |
| Vibration resistance | 10 to $55 \mathrm{~Hz}, 1$ sweep/min. Double amplitude of 0.75 mm 0.30 inch, 10 min . on 3 axes |  |
| Shock resistance | $98 \mathrm{~m} / \mathrm{s}^{2}$ or more, 4 times on 3 axes |  |
| Noise immunity | 1000 V (p-p) with pulse widths 50 ns and $1 \mu$ (using noise simulator) |  |
| Operating condition | Free from corrosive gases and excessive dust |  |
| Current consumption | 200 mA or less (24 V DC) |  |
| Protection | IP66-compliant front section (with rubber gasket.) |  |
| Weight | Approx. 130 g |  |

Input specifications (X0 to X7)

| Item |  | Description |
| :---: | :---: | :---: |
| Number of inputs |  | 8 points (6 points for thermocouple input type) |
| Insulation method |  | Photocoupler |
| Rated input voltage |  | 24 V DC |
| Operating voltage range |  | 21.6 to 26.4V DC |
| Rated input current |  | Approx. 4.3 mA |
| Input points per common |  | 8 points/common (6 points/common for thermocouple input type) <br> Either the positive or negative of the input power supply can be connected to common terminal. |
| Min. ON voltage/ON current |  | 19.2 V or less/4 mA or less |
| Max. OFF voltage/OFF current |  | 2.4 V or more/1 mA or more |
| Input impedance |  | Approx. $5.1 \mathrm{k} \Omega$ (X0, X1) <br> Approx. $5.6 \mathrm{k} \Omega$ (X2 to X 7 ) |
| Response time | OFF $\rightarrow$ ON | $50 \mu \mathrm{~s}$ or less (X0, X1) ${ }^{\text {note) }}$ |
|  |  | $100 \mu$ s or less (X2 to X5 $)^{\text {note) }}$ |
|  |  | 2 ms or less (X6, X7) |
|  | ON $\rightarrow$ OFF | $50 \mu \mathrm{~s}$ or less (X0, X1) note) |
|  |  | $100 \mu$ or less (X2 to X5) ${ }^{\text {note) }}$ |
|  |  | 2 ms or less (X6, X7) |
| Operating indicator |  | LCD display (I/O monitor mode) |

Note) X0 through X5 are inputs for the high-speed counter and have a fast response time. If used as normal inputs, you are recommend to insert a timer in the ladder program
as chattering and noise may be interpreted as an input signal.
Also, the above specifications apply when the rated input voltage is 24 V DC and the temperature is $25^{\circ} \mathrm{C}$.

Thermocouple input specifications

| Item | Description |
| :--- | :--- |
| Number of inputs | 2 points $(\mathrm{CH}: \mathrm{WX} 1, \mathrm{CH} 1: \mathrm{WX} 2)$ |
| Temperature sensor type | Thermocouple type K |
| Input range | -30.0 to $300.0^{\circ} \mathrm{C}$ note 1$)\left(-22\right.$ to $\left.572^{\circ} \mathrm{F}\right)$ |
| Accuracy | $\pm 0.5 \% \mathrm{FS} \pm 1.5^{\circ} \mathrm{C}\left(\mathrm{FS}=-30\right.$ to $\left.300^{\circ} \mathrm{C}\right)$ |
| Resolution | $0.1^{\circ} \mathrm{C}$ |
| Conversion time | $250 \mathrm{~ms} / 2 \mathrm{CH}^{\text {note 2) }}$ |
| Insulation method | Between internal circuit and thermocouple input <br> circuit: noninsulated note 3) <br> Between CH and CH 1 of thermocouple input: <br> PhotoMos insulation |
| Wire cut detection | Available |

Notes 1) Temperature can be measured up to $330^{\circ} \mathrm{C}\left(626^{\circ} \mathrm{F}\right)$. When the measured temperature exceeds $330^{\circ} \mathrm{C}\left(626^{\circ} \mathrm{F}\right.$ ) or the thermocouple wiring is disconnected, "K2000" is written to the register.
2) Temperature conversion for thermocouple input is performed every 250 ms . The conversion data is updated on the internal data register after the scan is completed.
3) The internal circuit and thermocouple input circuit are not insulated. Therefore, use the nongrounding type thermocouples and sheath tubes.

■ Transistor NPN output specifications (For Y0 to Y4)

| Item |  | Description |
| :---: | :---: | :---: |
| Insulation method |  | Photocoupler |
| Output type |  | Open collector |
| Rated load voltage |  | 5 to 24 V DC |
| Operating load voltage range |  | 4.75 to 26.4 V DC |
| Max. load current |  | 0.5 A |
| Max. surge current |  | 1 A |
| Output points per common |  | 5 points/common |
| OFF state leakage current |  | $100 \mu \mathrm{~A}$ or less |
| ON state voltage drop |  | 1.5 V or less |
| Response time | OFF $\rightarrow$ ON | $50 \mu$ s or less (For Y0 and Y1), 1 ms or less (For Y2,Y3 and Y4) |
|  | ON $\rightarrow$ OFF | $50 \mu$ s or less (For Y0 and Y1), <br> 1 ms or less (For Y2, Y3 and Y4) |
| External power supply (for driving internal circuit) | Voltage | 21.6 to 26.4 V DC |
|  | Current | $6 \mathrm{~mA} /$ point (For Yo and Y1) <br> $3 \mathrm{~mA} /$ point (For Y2, Y3, and Y4) |
| Surge absorber |  | Zener diode |
| Operating indicator |  | LCD display (I/O monitor mode) |

$\square$ COM. port communication specifications ${ }^{\text {note 1) }}$

| Item | Description |  |
| :---: | :---: | :---: |
| COM. port type | RS232C note 2) | RS485 |
| Isolation status with the internal circuit | Non-isolated | Isolated |
| Transmission distance | 15 m | 1200 m |
| Transmission speed note 3) (Baud rate) | $\begin{aligned} & 300,600,1200,2400, \\ & 4800,9600,19200 \mathrm{bit} / \mathrm{s} \end{aligned}$ | 9600,19200 bit/s note 4) |
| Communication method | Half-duplex |  |
| Synchronous method | Asynchronous communication method |  |
| Transmission format | Stop bit: 1 bit/2 bit |  |
|  | Parity: Not available/Available (Odd number/Even number) |  |
|  | Data length 7 bit/8 bit |  |
|  | Beginning code: STX available/STX not available |  |
|  | Ending code: CR/CR+LF/not available/ETX |  |
| Data output order | Starting from 0 bit per character |  |
| No. of connected units | - | 99 note 5) |
| Communication mode | - General-purpose communication <br> - Computer link <br> - Modbus RTU slave (scheduled) | - General-purpose communication <br> - Computer link <br> - Modbus RTU slave |

Relay output specifications (Y5)

| Item |  | Description |
| :---: | :---: | :---: |
| Output type |  | 1a (1 Form A, normally open) |
| Rated control capacity |  | 2 A 250 V AC, 2 A 30 V DC |
| Output points per common |  | 1 point/common |
| Response time | $\mathrm{OFF} \rightarrow \mathrm{ON}$ | Approx. 10 ms |
|  | ON $\rightarrow$ OFF | Approx. 8 ms |
| Life time | Mechanical | Min. $2 \times 10^{7}$ operations |
|  | Electrical | Min. $10^{5}$ operations (resistive load) |
| Surge absorber |  | None |
| Operating indicator |  | LCD display (I/O monitor mode) |

## Notes

1) When communicating between FP-e and other device, it is recommneded to perform resend processing
2) For RS232C wiring, be sure to use shield wires for higher noise immunity.
3) Set the baud rate of RS485 to both FP-e system register and FP-e internal switch. Set the baud rate of RS232C to FP-e system register
4) When sending a command from the FP-e is completed in RS485 communication, send a response from the receive device to the FP-e after the following time has been elapsed: $9600 \mathrm{bit} / \mathrm{s}: 2 \mathrm{~ms}$ or longer $19200 \mathrm{bit} / \mathrm{s}: 1 \mathrm{~ms}$ or longer
It takes at least 1 scan time (at least 2 ms ) for the FP-e to send back a response after receiveing the command.
5) When our C-NET Adapter or other RS485 device than recommended is connected in the system, the maximum connection number is limited to 32 units.

## FP-E Options

## Options

Backup battery
Included with calendar timer type
Part number: AFPG804

Protective cover

Part number: AQM4803

## Panel cover

(No printing for NAiS/FP-e)
Color: Ash-gray
Part number: AFPE805

Rubber gasket
Comes with FP-e control unit Part number: ATC18002

Terminal screwdriver Using when wiring terminal block Part number: AFP0806

## Panel cover

(No printing for NAiS/FP-e)
Color: Black
Part number: AFPE806

Mounting frame Comes with FP-e control unit Part number: AT8-DA4

Terminal socket set 4 terminal blocks
Part number: AFPE804

Panel cover
Color: Black (20 pcs)
Part number: AFPE803

Programming tool software Control FPWIN GR/FPWIN Pro
Part number: FPWINGRF-EN2 (Full version) FPWINGRS-EN2 (Small version) FPWINPROF-EN4 (Full version) FPWINPROS-EN4 (Small version)
